Total Guitar Magazine Checks Out The Masterbilt AJ-500M And The McCartney Texan

Be sure and check out the March 2006 issue of Total Guitar (UK)! On page 126 Ed Mitchell reviews the Epiphone [Masterbilt AJ-500M](#) and takes a look at the Epiphone [Paul McCartney Texan](#)!

Here's what Ed had to say about the AJ-500M:

... An acoustic guitar has to come up with the goods on its own. If its tone sucks then there's not a lot you can do about it. That's why picking up the AJ-500M VS gave us such a buzz. This thing sings!

...Studio engineers love guitars like this because they take the hard work out of getting a decent sound on tape.

...the playability of the AJ-500M VS is every bit as good as the tone...

...one of the greatest guitars (not just acoustic) to pass through TG towers.

And about the McCartney Texan?

... The craftsmen that built this guitar did an amazing job and if we had the money, we'd bag this guitar quicker than you could say Helter Skelter.
